

# EAP: Architecture Specification and Prototype

## A7: Web Resources Specification

Project modules are identified and briefly described to organize how they are presented in the yaml document.

### 1. Overview

Module	Description
<b>M01: Authentication and Individual Profile</b>	Web resources associated with user authentication and individual profile management. Includes the following system features: login/logout, registration, credential recovery, view and edit personal profile information.
<b>M02: Products</b>	Web resource associated with the search and listing of the products available to the user.
<b>M03: Reviews and Wishlist</b>	Web resources associated with reviews and wishlist. Includes the following system features: view review, add reviews, edit reviews and delete reviews; add items to wish list and remove items from the wish list.
<b>M04: Cart</b>	Web resources associated with the management of the cart.
<b>M05: Static pages</b>	Static pages like: about us, main features and contacts.
<b>M06: Management Area</b>	Web resources associated with website management, specifically: view and edit purchases, view, edit, add and delete properties, view, edit, add and delete categories and view, add and delete faqs.

### 2. Permissions

<b>PUB</b>	Public	Users without privileges
<b>USR</b>	User	Authenticated users
<b>OWN</b>	Owner	User that are owners of the information
<b>ADM</b>	Administrator	System administrators

### 3. OpenAPI Specification

This section includes the [GameSpace OpenAPI](#).

## A8: Vertical prototype

The Vertical Prototype incorporates the implementation of features identified as essential in the common and theme requirement documents. With this information, we have realized all user stories prioritized as high, as detailed in the sections below. The primary purpose of this artifact is to validate the presented architecture and provide us with foundational insights into the technologies employed in the project. In adherence to best practices, the implementation is grounded in the code of the LBAW Framework, involving comprehensive work across all layers of the solution's architecture. The prototype encompasses the realization of page visualizations (such as home, profile, product, cart, wishlist and search pages), content manipulation

operations (insertion, editing, and removal of addresses), and the incorporation of various error and success messages.

## 1. Implemented Features

### 1.1. Implemented User Stories

For the vertical prototype we decided to implement all of the user stories that had priority set to high.

User Story reference	Name	Priority	Description
US01	Product Details	High	As a User, I want to be able to see the product details, so that I can see a detailed representation of it.
US02	Search products	High	As a User, I want to be able to search for products, so that I can find what I'm looking for.
US14	Sign-in	High	As a Visitor, I want to be able to authenticate into the system, so that I can access privileged information.
US15	Sign-up	High	As a Visitor, I want to be able to register myself into the system, so that I can authenticate myself into the system.
US19	Add to Shopping Cart	High	As an Authenticated User, I want to be able to add products to the shopping cart, so that I can buy them later.
US20	Manage Shopping Cart	High	As an Authenticated User, I want to be able to manage my shopping cart, so that I can decide what I want to buy.
US21	Log out	High	As an Authenticated User, I want to be able to log in and out of my account, so that I can protect my personal information and ensure no unauthorized access to my account.
US22	View profile	High	As an Authenticated User, I want to be able to view my profile, so that I can see my personal data
US23	Edit profile	High	As an Authenticated User, I want to be able to edit my profile, so I can alter my personal data
US24	Delete account	High	As an Authenticated User, I want to be able to delete my account, so that I can remove my personal data from the site when I don't want to use it anymore
US42	Review a game	High	As a Buyer, I want to be able to write a review of a game that I have bought, so that other users can see what I thought of the game.
US43	Give games a score	High	As a Buyer, I want to be able to rate a game from 1 to 5, so that other users have an idea of the quality of the game.

User Story reference	Name	Priority	Description
US44	Delete a game score	High	As a Buyer, I want to be able to delete the score I've given to a game, so that other users don't see it.
US45	Check purchase history	High	As a Buyer, I want to be able to view my purchase history, so that I can check my past purchases.
US46	Delete a game review	High	As a Buyer, I want to be able to delete a previous review I wrote about a game, so that other users can't read it.

Table: vertical prototype implemented user stories

## 1.2. Implemented Web Resources

### Module M01: Authentication and Individual Profile

Web Resource Reference	URL
R101: Login Form	GET /login
R102: Login Action	POST /users/authenticate
R103: Logout Action	POST /logout
R104: Register Form	GET /register
R105: Register Action	POST /register
R106: View User profile	GET /users/{user}
R107: Edit User profile page	GET /users/edit
R108: Edit User profile action	PUT /users/edit
R109: Soft Delete Account	DELETE /users
R110: Save Address In Profile	POST /addresses
R111: Update Address In Profile	PUT /addresses/{address}
R112: Remove Address In Profile	DELETE /addresses/{address}

Table: authentication and profile's implementation

### M02: Products

Web Resource Reference	URL
R201: View All Products	GET /

Web Resource Reference	URL
R202: View Product	GET /products/{product}
R203: Search Products	GET /?search={text}
R204: Filter By Category	GET /?category={category}

Table: products' implementation

### M03: Reviews and Wishlist

Web Resource Reference	URL
R301: Review a game	POST /reviews
R302: Delete a game review	DELETE /reviews/{review}
R303: View Wishlist	GET /wishlist
R304: Add Product to Wishlist	POST /wishlist/{product}
R305: Remove Product from Wishlist	DELETE /wishlist/{product}

Table: game reviews and wishlist's implementation

### M04: Cart

Web Resource Reference	URL
R401: View Shopping Cart	GET /cart
R402: Add to Shopping Cart	POST /cart/{product}
R403: Remove from Shopping Cart	DELETE /cart/{product}
R404: Clear Cart	DELETE /cart
R405: Update Cart	PATCH /cart/{product}
R406: Checkout Items in Cart	POST /checkout

Table: cart's implementation

## 2. Prototype

For this prototype we focused our efforts in developing the main functionalities of the project. We applied some time on the visual aspect but the design might still have some bugs. Apart from this, it might be easy enough to get an idea of the general layout and easily navigate through the website.

The prototype is available at <http://lbaw23154.lbaw.fe.up.pt>

## Credentials (Verificar):

- user: test@test.com
- password: password

The code is available at <https://git.fe.up.pt/lbaw/lbaw2324/lbaw23154>
